

Conditioning Dogs to assist people
www.coservicedogs.com

We specialize in providing Service Dogs to assist with seizure alert and response, autism, psychiatric issues, mobility assistance, and other medical needs. Below are some examples of some of the tasks these assistance dogs can perform.

Seizure Alert and Response Service Dogs

- Alert to impending seizure so person can get to safe place
- Provide comfort during post-seizure moments,
- Retrieve medication or phone

Autism Service Dogs

- "Find and return" with autistic adult or child
- Help person snap out of autistic cycle

Psychiatric Service Dogs

- Bring medication and bottle of water
- Answer door, turn lights on, "watch my back"
- Call 911 or suicide hotline, bring help indoors

Mobility Service Dogs

- Carry groceries, carry other objects, put items on counters
- Pull person up from seated, prone or supine position
- Provide balance support over stairs or unsure terrain

Diabetic Alert Service Dogs

- Alert to impending hypoglycemia (low blood glucose)
- Retrieve medication or phone
- Remind person to take medication at pre-set times

Service Dogs for Children

- Alert and respond to health conditions & other emergencies
- Mobility assistance, panic response, seizure response, diabetic alert

Child safety and security enhancement through non-aggressive means

- Custom training for each individual
- Service Dogs for disabled children can aid in safety and security, such as blocking exterior doors, alerting if the child leaves a perimeter or preventing a child from exiting an area without permission, carrying identification at all times, responding to emergency situations by alerting or bringing help.
